

CASTLE MATH

presented by Emfinity

OVERVIEW

A Math based fun event where participants will have to solve a question and complete the tasks as explained in the description.

The event comprises of 3 stages:

Stage 1:

Participants will have to solve a question which will have a single digit answer. One of the partner will have to throw that many number of balls, the other partner should catch it and put it in a bowl.

Stage 2: Bowling alley

Number of bowling pins that go down, is added to the score and carried forward to the final round.

Stage 3: Board Game

The team has to get a total of the numbers, indicated on the side in a time-limit (2 min).

RULES

- A team will be given a chance to exchange the question only once, with a penalty of 5 points in the first round.
- A team failing to solve the question in 1st round cannot go further.
- No mobile phones or calculators allowed for calculation purposes. (It will be easy)
